RECTOR
UNIVERSITATIS ROSTOCHIENSIS
ALBERTUS Willebrand/ U.I.D.

Eferemus hodie, proh dolor! funus verè luctuosissimum, & acerbissimum lacrymis prosequendum. Efferemus, inquam, hodiè funus, magis cædis ante hac, quā nunc feretro aptum. Efferemus funus virginale, omnibus virginibus dolorificum; omnibus juventib⁹ & præcis infestum, omnibus bonis, & maximè mœstissimis parentibus, & propinquis grave ac acerbum. Verum nullus hic dolor attingitur, in vanū querelæ audiuntur, pectora frustrà tunduntur, capilli insulse scinduntur, chorus inutiliter clamatur, mors has ad unam omnes elevat querelas. Mors rectâ pervagatur omne mortaliū genus, à summis ad imos sarcina decurrit, rejecta omni ordinis, status, dignitatis, ætatis, sexus conditione, obvios quosvis acutâ falce demerit & secat. Hæc non attendit formosum juvenem, cincinnos in figuras torquērem; hæc non curat agiles manus, flexiles pedes, & inservit politorum hodiernorum complementa, seu inciviles civilitates: Hæc non moratur robur ac fortitudinem, sed æquè fortissimum, ac imbellem sternit; æquè reges & Principes throno & sceptris privat, ac misellos sublicos rugio, & stramintà casā: Hæc doctos æquè, ac indoctos, claros pariter, & obscuros rapit, ac cadaverosâ facie intuetur. Hæc pulchras pariter & deformes in nasci suam trahit: Elegantes & economas, non secus ac inertes, &

tes & domi sterentes fucos, nullis utiles, multis a. graves
è medio tollit. Distribitorum ejus est universale, nulla hīc
plaga mundi excipitur; perm̄it modò Asiam, modò
Africam, modò Europam, modò Americam, & omnes
nobis incognitas terræ partes. Proditū est literis ab Ari-
stotele, omnium iudicio maximo Philosopho, & in Pra-
etorice disciplinis omnibus palmam præcipiente, *in lib. de*
mirabilibus auscultationibus, apud Celtas venerum reperi,.
quod ab iis populis Xenicum, s. Toxicum appellatur, tan-
tā perniciitate inficiens & necans, ut venatores, cum tin-
cto jaculo cervum, aliamve feram percusserint, festinan-
ter accurrant, sauciataque carnem exscent, ne si virus
permeat, animal putrefaciat, & inutilis alimento caro red-
datur. Per magna quidem hæc Celtici pharmaci, s. vene-
ri (quod bonum pariter & malum est L. 236. D. de V. S.)
vis est, ac formidolosa: Sed multò perniciosius spirituale
virus illud à primis haustū parentibꝫ, ut ex libris abstrusæ,
rationique nostræ penitus admirabilis, & reconditæ sa-
pientiæ revelatæ divinitus constat. Non enim corporum
nostrorum dunctaxat singulos artus, verūm etiam facul-
tates inferiores animæ, superioresque pervadit, & pluri-
morum hominum perceleri interitu in dies comproba-
tur. Nuper diversas luximus puereras, juvenes uxores,
infantes, densata insimul fuerunt funera optimorum
juvenum studiosorum, & castissimatum virginum. Hinc
tot querimoniæ, totq; lamenta manarunt de humanæ vi-
tae fugacitate, non solùm in sacro Codice nobis fontem
rancæ, tamque acerbæ luis aperiente: sed & in autorum
profanorum literis. Ut a. à Celcis inventum fuit inter cæ-
tertra

ter aⁿti^pharma^cum, folium aliquod, quod C^oracium
vocant; sic vehementiori veneno, nostriq; corporis &
animæ velut internecioni contrarius, Dei bonitate im-
mensâ, longè potentior etiam surculus ex radice Isai
pullulavit atque effloruit, geminæ Gigas substantiæ, tām
æterno patri, quām intemeratæ virginī matri verè con-
substantialis, ut cum Synodo Nicænâ constanter Eccle-
sia confitetur. Hunc salutarem surculum, cœu præsentis-
simum antidotum, qui verà fide apprehendunt, etiam si
corporis hujus exuvias cogantur abjecere: tamen mini-
mè sempiternis ultricium flammaturum suppliciis manci-
pantur, & plumbatarum ictibus lacerantur, quas fuerūt
meriti, sed in omne ævum Dei conspectu, cœlestiq; bea-
titudine perfruūtur. Hujus primæ vi mali vim heu dolor!
floridâ in juventâ experta est piè defuncta nostra E V.
PHROSYNA, quæ verè fuit matris i^vφέτερη, gaudium &
delectamentum, uti nomen importat; auxiliatrix hæc al-
tera matri manus fuit, hæc mutuas operas tradidit in o-
mnibus domesticis negotiis; hæc nendo & fila trahendo
tempus exegit, & non emisistiis oculis, oculifera cele-
brando, & prætereuntes observando, ut fieri solet, idem
consumpsit: Hæc matri fuit obsequientissima, Hæc ve-
rè fuit in otio negotiosa, nec minus sola, quām cum sola;
hæc μηθή^ρ legitimè dicta, quod cum matre semper mo-
retur, domi maneat, & curet res domesticas, quemad-
modū apud Homerum Andromachæ & Penelopæ præ-
cipitur; Quin in tecta abiens tu a propria munia cura: Et mos
ille adhuc hodiè alicubi durat, ut ante nuptiæ in pu-
blico non conspiciantur, maximè præcipuæ originis, uti
in

in Persiâ, & alibi: Virgo recte veteribus Menandros dicta,
quod domi expectet maritum, quemadmodum id refer-
tur à summis Philosophis. Quinimò constat apud Athe-
nienses olîm puellas ursas vocari solitas, quod ursæ se co-
hibeant suapte naturâ, intra frutices & spelæa, raroque
conspiciatur & prodeant, nisi quantum pabulationis gra-
tiâ prodire coguntur. Et nihil horum condignè dicitur,
cujus specimen piè defuncta nostra suo exemplo non e-
diderit. At moriendum ei fuit, eâ lege nata est, ut vocan-
ti Domino assurgeret, eiq; pareret. Etsi in hoc mundo, di-
utius per Dei voluntatem superstes parentibus relicta
fuisse, marcessibilem coronam, & mundanum sponsum
suo statui & ordini covenientem eligere potuisset; tamen
jam ærea, cum Glauco & Diomede, aureis permutavit,
& loco marcessibilis, immarcessibilem coronam nacta;
pro mundano cœlestem sponsum Christum J E S U M,
omni copiâ & abundantia rerum scaturientem, cum vi-
gilantibus & sapientibus virginibus invenit. Huic in oc-
cursum rapta, in hujus amplexibus haret, & infinito ipsi⁹
saluatoris amore languet, jubilat, ac triumphat. Si fami-
liam & avitum inclitumq; majorum genus species, lon-
giori vitâ Elegantissima nostra defuncta digna fuisset.
Magna quippe benedictionis species est familiæ propa-
gatio, & prolificâ in stirpes deductio: quippe species re-
rum per eam conservantur: maxima a. è contrario pænæ
correptio, familiarum destructio. Quoniam a. teste Salo-
mone, memoria justi cum laudibus, & nomen impio-
rum putrescit, utique ab ultimis principiis, familiam de-
functa nostra brevibus repetemus. Nata est autem beata
